

CHILDREN'S HOSPITAL COLORADO PRESENTS

Pediatric Emergency Education Lecture Series: Emergent Complications of Medical Technologies in Children with Medical Complexity for Prehospital Providers

Friday, June 11th, 2021 • 9am-10am

Teleconference (Zoom Link sent day before the session for registered participants)

Overview, Target Audience and Learner Outcome

This activity for the interdisciplinary healthcare team will include a review of current literature for the evaluation, treatment and management of pediatric patients encountered in the prehospital or emergency setting. EMS Providers and Nurses working in the prehospital or emergency setting will benefit from this education. As a result of this activity, learners will be able to self-report new knowledge related to specific diagnoses to provide current, evidence-based care to pediatric patient with complex health needs.

Objectives

- Identify emergent and life-threatening complications of tracheostomies, VP shunts, and G/GJ tubes in children with medical complexity.
- Plan for and manage these complications in the prehospital and interfacility transports.
