## Overview, Target Audience, and Learner Outcome

This conference is for interdisciplinary healthcare team members caring for pediatric patients in a variety of settings. We will provide clinical updates and address current topics relevant to the care for sick and injured pediatric patients. As a result of attending this session, learners will be able to report new knowledge and intent to change practice to provide current, evidence-based care to pediatric patients.

## Objectives

- Review characteristics of innocent versus pathologic murmurs in congenital heart disease.
- Describe the medical assessment and monitoring of youth presenting with eating concerns in medical settings.
- Outline recognition and stabilization strategies for pediatric trauma cases.
- Identify one trauma informed principle or practice learners can apply in the work setting.
- Review the presentation and treatment of a variety of pediatric respiratory emergencies.
- Examine the latest evidence and identify strategies for optimizing outcomes from pediatric cardiac arrest.
