Colorado Pediatric Emergency and Trauma Conference 2024

Objectives

Following the presentations, attendees should be able to:

- Discuss the nuance and scope of the coroner and medicolegal death investigations as it relates to the statutory requirements of reporting deaths.
- Examine how a whole blood rotation system can provide prehospital whole blood with minimum waste and work for any trauma center.
- Identify life-threatening bleeding situations and apply appropriate techniques to control bleeding effectively, potentially saving lives in emergency situations.
- Review principles and approaches to pediatric facial trauma and reconstruction.
- Identify the concept of 'Missed Opportunities' to detect child abuse and learn strategies to mitigate the missed opportunity.
- Understand early management of complex orthopedic traumatic injuries.
- Formulate an approach to the use of intravenous fluids, antibiotics, and vasopressors in pediatric sepsis resuscitation.
- More to come...
