Pediatric Education Day | Hutchinson, KS

OVERVIEW AND TARGET AUDIENCE

This activity is for interdisciplinary healthcare team members caring for pediatric patients in an inpatient pediatric setting. We will provide clinical updates and address current topics relevant to the care for sick and injured pediatric patients.

LEARNER OUTCOME

After attending this education, learners will report increased knowledge of assessment and treatment principles presentation and management of pediatric respiratory emergencies. Learners will be expected to successfully demonstrate key pediatric clinical care skills including IV/IO access, fluid resuscitation, suctioning, use of oxygen devices, and stabilization techniques for the pediatric patient with respiratory disease.

OBJECTIVES

- Discuss assessment tools, initial interventions, and escalation for pediatric patients.
- Review a systematic approach to pediatric respiratory distress using case examples.
- Demonstrate key pediatric clinical care skills including suctioning, airway management, IV access, rapid fluid administration and nasogastric tube insertion.
