Pediatric Education Day with Emergency Physicians of the Rockies

Overview and Target Audience

This activity is for physicians and advanced practice providers caring for pediatric patients in an emergency setting. Clinical updates and current topics for intervention and management of the pediatric airway will be addressed.

Objectives

- Apply evidence-based clinical reasoning to the evaluation and management of challenging pediatric emergency department presentations.
- Demonstrate effective pediatric airway management skills including the selection and use of supraglottic airways, management of patients with tracheostomy, and airway rescue strategies.
- Perform pediatric endotracheal intubation using video laryngoscopy incorporating appropriate equipment selection and management of common complications.
- Manage the critically ill neonate utilizing a systematic approach to stabilization, resuscitation, and escalation of care.
- Obtain peripheral vascular access using point-of-care ultrasound guidance demonstrating proper technique, vessel identification, and troubleshooting strategies.

Learner Outcome

As a result of this activity, learners will be able to:

- Report new knowledge related to evidence-based care of ill and injured pediatric patients.
- Explain pediatric management strategies through case study analysis and perform key pediatric in return demonstrations.

Registration

To register for this course, [click here](#) or scan the QR Code.

Cancellation Policy

Children's Hospital Colorado reserves the right to modify the agenda or cancel the activity due to unforeseen circumstances.

Additional Information

For additional information, please contact Ray Cuellar at ray.cuellar@childrenscolorado.org. If you require special assistance or accommodation to fully participate, please notify us at least four weeks in advance of the activity.

Agenda

Thursday, September 24, 2026

- | | |
|-----------|--|
| 8:45 a.m. | Check-in |
| 9:00 | Welcome and Opening Remarks |
| 9:15 | Tricky Pediatric Cases
