

# 31<sup>st</sup> Annual O'Neil Pediatric Clinical Update

## September 28, 2022

### Virtual Conference / Attend via Zoom

Children's Hospital Colorado  
Anschutz Medical Campus  
Aurora, Colorado

**Provided by Division of Patient Care Services / Professional Development Department**

#### Overview, Target Audience and Learner Outcome

This conference focuses on assessment and management of common pediatric conditions in hospital, ambulatory and community settings. Current clinical issues and implications for children's health and practitioner care delivery are presented and discussed.

Interprofessional participation is encouraged for RNs, advanced practice providers, child life specialists, medical assistants, OTs, PTs, RTs, social workers, students, EMS providers and others interested in improving the care of infants, children, and youth.

After attending this educational offering, participants will self-report increased knowledge of current and emerging trends in pediatric healthcare.

#### Continuing Education Credit

Registration, attendance, sign-in and submission of the evaluation, including a written response to questions related to any change in practice that you may make as a result of learning that took place at this activity, are required for successful completion and receipt of the certificate of attendance. Claim only those hours you attend.

Children's Hospital Colorado is approved as a provider of nursing continuing professional development by Colorado Nurses Association, an accredited approver by the American Nurses Credentialing Center's Commission on Accreditation. This offering for 6.75 nursing contact hours is provided by Children's Hospital Colorado.

**Children's Hospital Colorado**

Affiliated with  
University of Colorado  
Anschutz Medical Campus

## Objectives

- Explore types of media use that are most harmful to youth mental health as well as how to help youth develop healthy media habits to support their growth and wellbeing.
- Discuss the evidence-based diagnosis and management of Type 2 diabetes in youth.
- Summarize the epidemiology, management and prevention of COVID-19 in children
- Discuss the emergence of enterovirus D68 and its association with acute flaccid myelitis
- Discuss the role of improved surveillance in preparing for future pandemics of emerging pathogens
- Highlight the role of pediatric clinical research in our understanding of infectious diseases
- Examine the spectrum of varying presentations of Overmedicalization
- Discuss common presentations, diagnosis, management, and off-therapy principles for pediatric leukemias.
- Discuss differential diagnoses, management plans and hospital courses for patients presenting with urgent and emergent complaints to a pediatric emergency department
