Faculty

Children's Hospital School Health Team

Overview

Optimizing student health outcomes, improving school performance, boosting attendance, and promoting the overall well-being of school-aged children with medical complexities are essential student priorities in expanding access to comprehensive training for nurses and healthcare providers working in both urban and rural communities across Colorado. This initiative is designed to equip school and community-based nurses, including childcare health consultants, with the knowledge and skills necessary to effectively support children with special healthcare needs. Targeted education related to the top nine health conditions seen in school settings and take-home training kits will empower these healthcare professionals to deliver high-quality care and train/delegate Unlicensed Assistive Personnel (UAPs) effectively to ensure that children with medical complexities can thrive in their educational environments.

Target Audience

The target audience for this activity are School Nurses and Childcare Health Consultants providing care to students in the school and childcare setting.

Learner Outcomes

At the session's end, participants will report increased knowledge related to the top nine health conditions seen in school settings and how to access additional resources related to these common issues/conditions. Participants will report increased confidence in skills required to care for students with these common issues/conditions as well as training and delegating to UAPs. Participants will report at least one practice change they plan to make due to this education.

Nursing Continuing Professional Development Credit

Registration, sign-in, attendance, and submission of the evaluation, including a written response to questions related to any change in practice that you may make due to learning that took place at this program, are required for successful completion and receipt of the certificate of attendance. Claim only those hours you attend.

Children's Hospital Colorado is approved with distinction as a provider of nursing continuing professional development by Colorado Nurses Association, an accredited approver by the American Nurses Credentialing Center's Commission on Accreditation. This educational offering for 6.75 nursing contact hours is provided by Children's Hospital Colorado.
