40th Annual Community and School Health Pediatric Conference

with Telephone Triage

Overview, Target Audience, and Learner Outcome

Our nation continues to face increasingly complex issues impacting the health and well-being of children and families. It is essential healthcare providers are aware of the latest research and evidence-based practice to provide optimal care. This conference will emphasize an integrated approach to care among family, community, and healthcare teams through engaging presentations and thought-provoking discussions.

The target audience includes pediatric nurses, advanced practice providers, therapists, social workers, mental health counselors, care coordinators, case managers, and others assisting children and their families with healthcare needs in hospital, ambulatory, telephone triage, community health, public health, school, childcare, and home settings.

At the end of this program, participants will report increased knowledge of current pediatric and community health challenges, guidelines, and evidence-based practices. Participants will report at least one practice change they intend to make as a result of this education.

Agenda

Thursday, June 11, 2026

7:15 a.m.	Check-in
7:45	Welcome & Opening Remarks
